

1. COMPUTER TERMINALS

1) USING COMPUTERS ON CAMPUS

Each campus of the University of Tokyo is equipped with computers connected to the **Educational Campuswide Computing System (ECCS)**, in addition to computers installed by faculties and related institutions. ECCS terminals are accessible to all registered students, staff and teaching staff members. They are all connected to the University of Tokyo computer network (UTNet), and provide access to the Internet.

① ECCS access points

ECCS terminals are located in the following buildings or faculties. For more information, consult the “ECCS User Guide”.

<http://www.ecc.u-tokyo.ac.jp/guide/current/> (Japanese only)

● Hongo Campus

Information Technology Center / General Library / Faculty of Law / Faculty of Engineering / Faculty of Letters / Faculty of Science / Faculty of Agriculture / Faculty of Economics / Faculty of Education / Faculty of Pharmaceutical Sciences / International Center / Fukutake Hall

● Komaba Campus Information Education Building / Komaba Library

● Kashiwa Campus Kashiwa Library

② ECCS user accounts

A user account is necessary to access the terminals. First-year students receive an account after they attend an orientation lecture. Other users can apply for an account after they attend an information session organized by the Information Technology Center. Information sessions are organized regularly on the Hongo Campus (Information Technology Center building, Asano section) and on the Komaba Campus (Information Education Building).

ECCS accounts must be renewed every year.

Detailed information regarding information sessions and the registration procedure is posted on the ECCS website.

2) BRINGING YOUR OWN COMPUTER

Another way of accessing UTNet and the Internet is to connect your own computer to the network, an operation that also requires an ECCS account. Two types of connection are available: wired and wireless.

①Wired connections

Information sockets are available in several locations, particularly near ECCS terminals. You will need to bring your own LAN cable to connect your computer to the network.

②Wireless connections

Wireless access points allow computers equipped with a wireless network card to access the network as long as they are within range of an antenna.

An additional registration procedure is necessary to access wireless services. The procedure can be completed online (contact information: ecc-support@ecc.u-tokyo.ac.jp).
