Cover illustration : Matsu no Sakae (held in General Library)

“Matsu no Sakae”(1889) - woodblock print by Utagawa Kunisada the 3rd (1848-1920).

The Red Gate (Akamon in Japanese) visible on the print is one of the University of Tokyo's famous symbols. It was built by Lord Maeda Nariyasu of Kaga (currently in Ishikawa Pref.) in 1827, to celebrate his marriage to Princess Yo, a daughter of Shogun Tokugawa Ienari. The scene, printed from three large woodblocks, depicts Princess Yo's procession on its way to the Red Gate. Utagawa Kunisada the 3rd was the disciple of Utagawa Kunisada (1786-1864), one of the great ukiyo-e masters of the late Edo period.

About University of Tokyo Library System

The University of Tokyo Library System is composed of the General Library, the Komaba Library (combines the functions of the Graduate School of Arts and Sciences Library), the Kashiwa Library, and 27 libraries attached to departments or related research institutions. Despite the distances separating the three main campuses of Hongo, Komaba and Kashiwa, and several other off-campus facilities, the libraries of the University of Tokyo provide a large variety of services within a single, integrated system.

Their holdings total 9.8 million volumes – expanding at a rate of approximately hundred thousand volumes per year in recent years – and 170 thousand periodical titles.

Measures to Prevent the Spread of COVID-19

In accordance with the “The University of Tokyo Activity Restrictions Index for Preventing the Spread of Coronavirus Disease” and the policies of each department, the University of Tokyo Library System is seeking ways to provide services that adopts the new styles of education and research.

Following the declaration of a state of emergency in April 2020 and the resulting increase in the University’s activity restriction guideline level, all libraries at the University of Tokyo were closed. During this period, we made every effort to ensure that the services are provided by expanding and newly providing electronic resources and mailing services for materials and photocopies.

In addition, in order to provide safe environment, the acrylic panels have been installed at the counters, and the facility is thoroughly ventilated and cleaned regularly. In the library, we ask for users’ cooperation in wearing masks, sanitizing the hands at the entrance, and using the desks with extra space between them.

The Replacement of the Library Web System and the Renewal of the Portal Site for Academic Information Literacy.

The library web system was renewed in August 2021. With this renewal, it is possible to search electronic resources from the OPAC. The layout was also optimized to fit the size of the screen, making it easier to use on smartphones and tablets.

In addition, the portal site for academic information literacy, including database search, has been redesigned and the new “Literacy” site has been launched.

The site provides information on searching for literature, using literature management tools, workshops, and necessary process for preparing reports and papers. It also provides detailed information on accessing the database from off-campus (EZproxy), which was also renewed.

Asian Research Library OPEN

The Research Advancement Section for the Asian Research Library (RASARL) was established on April 1, 2021. With the aim of creating an environment that supports the world’s best education and research in the field of Asian studies, RASARL is led by three full-time faculty members who provide research support to Asian studies researchers and manage the Asian Research Library, such as building the library’s collection, with the aim of establishing and promoting the Subject Librarian system.
